

# IBM Director, Version 4.11, Hardware and Software Compatibility

This document provides the following information:

- IBM® Director Agent, Version 4.11, support for IBM hardware (see page 1)
- IBM Director, Version 4.11, support for operating systems and software (see page 5)

## IBM Director, Version 4.11 supported hardware

IBM Director Agent is licensed for use and supported on the following IBM systems and products:

- IBM eServer™ xSeries® and Netfinity® servers
- IBM eServer BladeCenter™ chassis
- IBM eServer blade servers
- IBM IntelliStation® workstations
- IBM ThinkCentre™, NetVista™, and PC desktop computers
- IBM TotalStorage™ Network Attached Storage (NAS) products
- IBM ThinkPad® mobile computers
- IBM SurePOS™ point-of-sale systems

### Notes:

1. Some models might not be available in your area.
2. The IBM TotalStorage NAS products are preloaded with IBM Director Agent.

For a list of specific models that IBM Director supports, see the following System and product support list.

**Compatibility mode** means that IBM Director provides basic systems-management capabilities (such as system discovery, inventory collection, and the display of basic system information). Support for hardware-specific features might be included in a later release of IBM Director. Hardware-specific features can include the following items:

- Alert Standard Format (ASF) task
- Asset ID™ task
- Hardware Status task
- Rack Manager task
- Predictive Failure Analysis® (PFA) alerts for memory and processors
- Environmental sensor monitoring (such as temperature, fan, voltage, power-supply status, and chassis intrusion detection)

## **IBM Director, Version 4.11, supported operating systems and software**

This section provides the following information:

- IBM Director Server supported operating systems
- IBM Director Console supported operating systems
- IBM Director Agent supported operating systems
- IBM Director support for workgroup and enterprise software
- IBM Director limitations and performance considerations

### **IBM Director Server**

IBM Director Server, which installs all IBM Director components, requires the TCP/IP network protocol and is supported on the following operating systems:

- Microsoft® Windows® Server 2003, Standard, Enterprise, and Web Editions
- Windows 2000 Server (Service Pack 3 required)
- Windows 2000 Advanced Server (Service Pack 3 required)
- Red Hat Linux, Version 7.3
- Red Hat Enterprise Linux AS, Version 2.1
- SuSE Linux, Version 8.0
- SuSE Linux Enterprise Server, Version 8.0

### **IBM Director Console**

IBM Director Console requires the TCP/IP network protocol and is supported on the following operating systems:

- Windows Server 2003, Standard, Enterprise, and Web Editions
- Windows XP Professional (Service Pack 1 recommended)
- Windows 2000 Professional (Service Pack 3 required)
- Windows 2000 Server (Service Pack 3 required)
- Windows 2000 Advanced Server (Service Pack 3 required)
- Red Hat Linux, Version 7.3
- Red Hat Enterprise Linux AS, Version 2.1
- SuSE Linux, Version 8.0
- SuSE Linux Enterprise Server, Version 8.0

### **IBM Director Agent**

IBM Director Agent is supported on the following operating systems:

- Windows NT® 4.0 Workstation (Service Pack 6a or later required)
- Windows NT 4.0 Server (Standard, Enterprise, and Terminal Server Editions) (Service Pack 6a or later required)
- Windows NT 4.0 Server with MetaFrame (Service Pack 6a or later required)
- Windows Server 2003, Standard, Enterprise, Web, and Datacenter Editions
- Windows 2000 Server, Advanced Server, or Datacenter (Service Pack 3 required)
- Windows 2000 Professional (Service Pack 3 required)
- Windows XP Professional (Service Pack 1 recommended)
- Red Hat Linux, Versions 7.1, 7.2, 7.3

- Red Hat Enterprise Linux AS, Version 2.1 (formerly Red Hat Linux Advanced Server, Version 2.1)
- SuSE Linux, Versions 7.2, 7.3, 8.0, and Enterprise Server, Version 8.0
- Novell NetWare 6.0
- Caldera Open UNIX®, Version 8.0
- VMware ESX Versions 1.5.2, 2.0 (Console machine only)

IBM Director Agent can use the following network protocols:

- TCP/IP
- NetBIOS
- IPX
- SNA
- SLIP
- HTTP

If you choose to install the Web-based Access feature for IBM Director Agent, the following Web browsers are supported:

- Microsoft Internet Explorer, Version 4.1 or later
- Netscape Navigator, Version 4.x or 7.01

## Software support for workgroup and enterprise systems-management software

Using Upward Integration Modules, IBM Director Agent can be integrated with robust workgroup and enterprise management software from IBM (such as Tivoli® software), Computer Associates, Hewlett-Packard, Microsoft, NetIQ, and BMC Software.

For more information, see the *IBM Director 4.1 Upward Integration Modules Installation Guide* and the IBM Director Upward Integration Web page at [http://www.ibm.com/servers/eserver/xseries/systems\\_management/sys\\_migration/nfdirupward.html](http://www.ibm.com/servers/eserver/xseries/systems_management/sys_migration/nfdirupward.html).

## IBM Director limitations and performance considerations

IBM Director, Version 4.11, can manage up to 5,000 licensed clients with one management server.

The number of clients that IBM Director Version 4.11 can manage efficiently varies according to the existing network load and the functions you want to perform. System discovery, frequent presence checks, and alert usage can increase network traffic. Precise performance information must be ascertained in each individual environment.

When installing the default configuration for IBM Director Agent on a managed system, 64 MB of system memory is sufficient. However, if you choose to install additional IBM Director Agent features, 128 MB of system memory is recommended.

For more information about IBM Director limitations and performance considerations, see the *IBM Director 4.11 Installation and Configuration Guide*.
